

PAIN MANAGEMENT CLINIC

Dr. Naveen Tipirneni, Director of the Pain Management Clinic, specializes in stopping chronic pain in its tracks.

The most common complaints patients make to doctors involves pain.

What can be done? A physician has several treatment options including the use of physical, neurological techniques or drug intervention. Dr. Tipirneni offers various methods from nerve blocks to spinal cord stimulation.

Pain management can help the person suffering with either acute or chronic pain. The clinic will examine every avenue, look at the total person and evaluate a specific lifestyle with respect to the overall health and well-being of the person. Our goal is to reduce or completely alleviate pain and to enable a person to regain an active personal lifestyle, both in the home and in the community.

Acute and chronic pain management interventions are available on various levels to meet the individual's needs. Office screenings and treatments are offered for some patients, with outpatient and/or inpatient services when indicated.

The most common procedures performed by Dr. Tipirneni are:

Lumbar and cervical injections

Discography

Radiofrequency ablation

Discectomy – Disc Decompression

Spinal Cord Stimulation
